

NAVIGATING

DISRUPTIVE  INNOVATION

ACIIA CAE
Leadership Forum

NAVIGATING THROUGH DISRUPTIVE BUSINESS INNOVATION

Disruptive innovation has altered business across the world. The speed of change has increased dramatically every decade since the 1980's and now its velocity is getting quicker every six months. Business models getting disrupted through innovative use of technology is now commonplace. The innovation wind is spreading wide and even the marketplace itself is being reinvented at various industries, with the customer being part of the delivery chain and serving himself/herself. In this environment catching up is not a priority, but reinventing services and delivery model is the new normal for business to flourish. Welcome to the world of Bots & Cognitive applications that mimic human thinking. All of this is not only being applied in manufacturing alone but now in business and do-

ing accounting, reporting, etc. Some CAEs are doing remarkably well in this environment and this CAE Leadership forum is going to make a difference in the way you will view your future role ahead.

Are CAE's ready to bring value to their entities to drive through disruptive innovation? The 2017 CAE Leadership Forum aims at preparing CAE's change their mindset and start looking at opportunities to equip themselves thereby being ahead of the curve for being a collaborative partner for enabling disruptive innovation and its internal audit. Delegates will have the opportunity to network and listen to towering leaders and industry experts.
